BOOK SYNOPSIS

E-health, the application of information and communication technologies to the health sector, offers the potential for huge benefits for hard-pressed health services at the country level, but remains a topic about which there are still many more questions than answers. The annual Commonwealth Health Ministers Book provides Health Ministers and senior officials in health ministries with a central source of information regarding current health priorities focused around the Millennium Development Goals. Produced for the annual Commonwealth Health Ministers Meeting, the 2008 edition is focused on e-health. With contributions from many of the world's leading experts on e-health issues, this seminal publication also presents a number of unique country reviews of e-health initiatives from around the Commonwealth, unavailable elsewhere.
